Dear Sirs/Mesdames:

Re: **Sultan Minerals Inc.** (the "Company")
Rule 12(g)3-2(b) Exemptions - File #82-4741
Under the United States Securities Exchange Act of 1934

Please find enclosed for 12(g) Exemption status the documents required to be filed with the British Columbia Securities Commission and the TSX Venture Exchange. Please note that the Company is a foreign issuer and its securities are neither traded in the United States nor quoted on NASDAQ.

We trust that the information included in this package is complete. However, should you have any questions regarding the foregoing, please do not hesitate to contact the writer.

Sincerely,

Rodrigo A. Romo
Paralegal

SULTAN MINERALS TO TRENCH PORPHYRY COPPER-GOLD ZONE ON ITS KENA PROPERTY, BC

Sultan Minerals Inc. (SUL-TSX-Venture) (“Sultan” or the “Company”) is pleased to announce that it is commencing an excavator trenching program on its Kena Gold-Copper Property (“Kena Property”), located in southeast British Columbia. The program will investigate a large, 2,500 metre by 450 metre copper-gold soil geochemical anomaly confirmed by soil and rock chip sampling in 2007 (see news release dated January 29, 2008). The copper-gold soil geochemical anomaly (termed the Kena Copper Zone) lies three kilometres south of Sultan’s Gold Mountain and Kena Gold Zones, which together host a drill inferred resource of more than 50 million tonnes of porphyry style gold mineralization (see NI 43-101 report dated June 3, 2004).

The Kena Property is located 25 kilometres north of Sultan’s Jersey-Emerald Tungsten-Molybdenum property (“Jersey-Emerald”). The trenching program is being supervised from Sultan’s Salmo office by the exploration team that is managing ongoing exploration at Jersey-Emerald.

The Kena Copper Zone was initially identified in the 1970s, and work programs were carried out in the 1970s and 1980s by a number of exploration companies including Kerr Addison, Lacana, Tournigan Mining and Noramco. Soil sampling identified a large, strong copper geochemical anomaly with associated gold values. This soil anomaly has dimensions of 2,500 metres in north-south length by an average of 450 metres in width as outlined by the 300 ppm copper contour. Within this large anomaly there are numerous soil samples assaying between 1,000 and 5,000 ppm copper. Accompanying the copper soil anomaly is an associated, partially overlapping, strong gold geochemical anomaly with dimensions of 1,200 by 200 metres. There are also several smaller gold anomalies scattered throughout the copper anomaly.

Geological mapping shows the Kena Copper Zone consists of porphyry style copper-gold mineralization. Copper mineralization comprised of chalcopyrite and pyrite occurs as disseminations and fracture fillings and in quartz veinlets within sub-volcanic intrusive rocks, and as weaker disseminations and fracture fillings in adjacent tuffaceous rocks. The area has been variably silicified by quartz veins that occur as stockworks, narrow fracture fillings or rarely thick veins up to 0.5 metres wide containing pyrite and chalcopyrite.

A due diligence soil and rock chip sampling program was carried out on the Kena Copper Zone in late 2007 (see news release dated January 29, 2008). Intermediate soil geochemical lines sampled and confirmed the presence of the large copper soil anomaly. During this program, rock

chip samples were also collected from two historic adits located centrally within the Kena Copper Zone. Sultan found no previous records describing these adits.

Thirteen contiguous 2-metre rock chip samples taken by Sultan from a short adit showed a 26-metre zone grading 0.51% copper. The best 2 metre chip sample assayed 1.65% copper and 0.53 g/t gold. During the course of chip sampling a number of grab samples were also collected from cross-cutting quartz veins and mineralized shears. These quartz veins gave assays as high as 4.62% copper and 1.03 g/t gold.

The currently planned work program will consist of excavating ten 50 metre long trenches within the coincident copper-gold soil geochemical anomaly. These trenches will be wide spaced, put in along strike over a distance of 1.9 kilometres. Once the trenches have been mapped, sampled and assayed, a diamond drilling program is proposed to test the best target areas located by the trenching program.

Sultan is currently undertaking an updated resource estimate for tungsten on its nearby Jersey-Emerald property where assays are pending for ten surface drill holes on the recently discovered East Emerald Tungsten Zone.

Linda Dandy, P.Geo., is the project supervisor and "Qualified Person" on the Kena Property for the purpose of National Instrument 43-101, who has reviewed and verified the contents of this news release.

SULTAN MINERALS INC.

(an exploration stage company)

Notes to Interim Financial Statements

Three and six months ended June 30, 2008 and 2007

(Unaudited – prepared by management)

1. Nature of operations:

Sultan Minerals Inc. (the "Company") is incorporated under the British Columbia Business Corporations Act, and its principal business activity is the exploration and development of mineral properties in Canada.

As disclosed in the financial statements, the Company has working capital, as at June 30, 2008, of \$3,006,232 (December 31, 2007 – \$4,124,973) and an accumulated deficit of \$13,565,425 (December 31, 2007 – \$13,237,067). Working capital is defined as current assets less current liabilities.

The Company has capitalized \$8,205,133 (December 31, 2007 - \$7,120,104) in acquisition and related costs on the Kena property, the Jersey and Emerald properties and the Stephens Lake property.

The Company is in the process of exploring its mineral property interests and has not yet determined whether its mineral property interests contain mineral reserves that are economically recoverable.

2. Accounting policies:

Basis of presentation

The accompanying financial statements for the interim periods ended June 30, 2008 and 2007, are prepared on the basis of accounting principles generally accepted in Canada and are unaudited, but in the opinion of management, reflect all adjustments (consisting of normal recurring accruals) necessary for fair presentation of the financial position, operations and changes in financial results for the interim periods presented. The financial statements for the interim periods are not necessarily indicative of the results to be expected for the full year. These financial statements do not contain the detail or footnote disclosure concerning accounting policies and other matters, which would be included in full year financial statements, and therefore should be read in conjunction with the Company's audited financial statements for the year ended December 31, 2007.

The accounting policies followed by the Company are set out in Note 2 to the audited financial statements for the year ended December 31, 2007, and have been consistently followed in the preparation of these financial statement except that the Company has adopted the following Canadian Institute of Chartered Accountants guidelines effective for the Company's first interim period commencing January 1, 2008:

3. Changes in accounting policies:

Financial Instruments – recognition and measurement

Section 3855 requires that all financial assets, except those classified as held to maturity, and derivative financial instruments, must be measured at fair value. All financial liabilities must be measured at fair value when they are classified as held for trading; otherwise, they are measured at amortized cost.

The Company's independent auditor has not performed a review of these interim financial statements.

SULTAN MINERALS INC.

(an exploration stage company)

Notes to Interim Financial Statements

Three and six months ended June 30, 2008 and 2007

(Unaudited – prepared by management)

3. Changes in accounting policies (continued):

Financial Instruments – recognition and measurement (continued)

The Company accounts for its portfolio investments as long-term investments. Section 1530 – “*Comprehensive Income*” of the Canadian Institute of Chartered Accountants Handbook (“CICA”) is the change in the Company's net assets that results from transactions, events and circumstances from sources other than the Company's shareholders and includes items that would not normally be included in net earnings such as unrealized gains or losses on available-for-sale investments. Other comprehensive income includes the holding gains and losses from available-for-sale securities, which are not included in income (loss) and realized.

Investments classified as available-for-sale are reported at fair market value (or mark to market) based on quoted market prices with unrealized gains or losses excluded from the earnings or loss and reported as other comprehensive income or loss.

Comprehensive income and transition adjustment to opening balance

The adoption of Sections 1530 and 3855 impacts the opening equity and losses of the Company. The unrealized gain on the available-for-sale securities from purchase to December 31, 2007, was \$1,018, which is reported as an adjustment to the opening balance of accumulated other comprehensive income. The unrealized loss on the available-for-sale securities for the six months ended June 30, 2008, was \$391, which is reported in the current period. There would be no tax impact resulting from adjustments arising from comprehensive income as there are unrecorded income tax assets that would result in no income tax being payable.

Investments available for sale are reported at fair market value (or mark to market) based on quoted market prices with unrealized gains or losses excluded from earnings and reported as other comprehensive income or loss. Investments subject to significant influence are reported at cost and not adjusted to fair market value. All of the Company's investments have been designated as available-for-sale.

Accounting policy choice for transaction costs

On June 1, 2007, the Emerging Issues Committee of the CICA issued Abstract No. 166, “Accounting Policy Choice for Transactions Costs” (EIC 166). This EIC addresses the accounting policy choice of expensing or adding transaction costs related to the acquisition of financial assets and financial liabilities that are classified as other than held for trading. Specifically, it requires that the same accounting policy choice be applied to all similar financial instruments classified as other than held for trading, but permits a different policy choice for financial instruments that are not similar. The Company has adopted EIC 166 effective December 31, 2007, which requires retroactive application to all transaction costs accounted for in accordance with CICA Handbook Section 3855, Financial Instruments – Recognition and Measurement. The Company has evaluated the impact of EIC 166 and determined that no adjustments are currently required.

The Company's independent auditor has not performed a review of these interim financial statements.

SULTAN MINERALS INC.

(an exploration stage company)

Notes to Interim Financial Statements

Three and six months ended June 30, 2008 and 2007

(Unaudited – prepared by management)

4. New accounting pronouncements:

Capital disclosures

CICA handbook Section 1535, Capital Disclosures, establishes standards for disclosing information about the Company's capital and how it is managed. Under this standard, the Company will be required to disclose the following, based on the information provided internally to the Company's key management personnel: (i) qualitative information about its objectives, policies and processes for managing capital; (ii) summary quantitative data about what it manages as capital; (iii) whether during the period it completed with any externally imposed capital requirements to which it is subject; and (iv) when the Company has not complied with such externally imposed capital requirements, the consequences of such non-compliance.

This standard is effective for interim and annual financial statements beginning on January 1, 2008. The Company manages its common shares, options and warrants as capital. As the Company is in the exploration state, its principal source of funds is from the issuance of common shares. It is the Company's objective to safeguard its ability to continue as a going concern, so that it can continue to explore and develop its projects for the benefit of its stakeholders.

The Company is listed on the TSX Venture Exchange. The TSX Venture Exchange imposes certain capital requirements prior to listing; however, there are no ongoing capital requirement to remain listed on the TSX Venture Exchange.

Financial instruments disclosures

CICA Handbook Section 3862, "*Financial Instruments – Disclosures*", requires entities to provide disclosure of quantitative and qualitative information in their financial statements that enable users to evaluate (a) the significance of financial instruments for the Company's financial position and performance; and (b) the nature and extent of risks arising from financial instruments to which the company is exposed during the period and at the balance sheet date, and management's objectives, policies and procedures for managing such risks. The Company will be required to disclose the measurement basis or bases used, and the criteria used to determine classification for different types of instruments. The section requires specific disclosures to be made, including the criteria for (i) designating financial assets and liabilities as held for trading; (ii) designating financial assets as available-for-sale; and (iii) determining when impairment is recorded against the related financial asset or when an allowance account is used. This standard is effective for interim and annual financial statements beginning on January 1, 2008.

As of June 30, 2008, the Company's carrying values of cash, short-term investments, accounts receivable, and accounts payable approximate their fair market values.

Credit risk

Financial instruments that potentially subject the Company to credit risk consist of cash, short-term investments, and accounts receivable. The Company deposits cash and short-term investments with Canadian chartered banks with a credit rating of R-1 High or equivalent.

Currency risk

As at June 30, 2008, most of the Company's cash and short-term investments were held in Canadian dollars. The Company's functional and reporting currency is the Canadian dollar. The Company's currency risk is nominal, as cash balances kept in United States dollars are nominal and are used for nominal expenditures in that currency.

The Company's independent auditor has not performed a review of these interim financial statements.

SULTAN MINERALS INC.

(an exploration stage company)

Notes to Interim Financial Statements

Three and six months ended June 30, 2008 and 2007

(Unaudited – prepared by management)

4. New accounting pronouncements (continued):

Interest rate risk

Included in the loss for the year in these financial statements is interest income on Canadian dollar cash and short-term investments. If interest rates throughout the year had been 10 basis points (0.1% lower (higher)), then the loss for the period would have been under nominal and would have had no effect on the operations of the Company.

Liquidity risk

The Company manages liquidity risk by maintaining sufficient cash and short-term investment balances. Liquidity requirements are managed based on expected cash flow to ensure there is sufficient capital in order to meet short-term obligations.

Market risks

The significant market risks to which the Company is exposed are commodity price risk, interest rate risk and foreign exchange risk.

Commodity price risk

The Company's ability to raise capital to fund exploration or development activities is subject to risks associated with fluctuations in the market prices of gold, tungsten, molybdenum, copper and zinc, all commodities that are in the two significant mineral property interests held by the Company.

General standards on financial statement presentation

CICA Handbook section 1400, "*General Standards on Financial Statement Presentation*", has been amended to include requirements to assess and disclose an entity's ability to continue as a going concern. The changes are effective for interim and annual financial statements beginning on or after January 1, 2008. The adoption of these changes has not had an impact on its interim financial statements.

International Financial Reporting Standards ("IFRS")

In 2006, the Canadian Accounting Standards Board ("AcSB") published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian GAAP with IFRS over an expected five year transitional period. In February 2008, the AcSB announced that 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada's own GAAP. The date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of January 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the year ended December 31, 2010. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

5. Mineral property interests:

(a) Kena Property, Ymir, British Columbia, Canada

The Kena property is comprised of the original Kena claims and additional properties under option. The properties are contiguous. The Kena property is located near the community of Ymir in southeastern British Columbia.

The Company's independent auditor has not performed a review of these interim financial statements.

SULTAN MINERALS INC.

(an exploration stage company)

Notes to Interim Financial Statements

Three and six months ended June 30, 2008 and 2007

(Unaudited – prepared by management)

5. Mineral property interests (continued):

(b) Jersey and Emerald Properties, Salmo, British Columbia, Canada

The Company holds a 100% interest in the Jersey Claim Group located near Salmo, British Columbia.

In June 2006, the Company entered into a purchase agreement to acquire 100% right, title and interest in the surface rights over a portion of 28 crown granted mineral claims, four 2-post claims and 80 mineral units located near Salmo, British Columbia. Under the terms of the agreement, the Company made a payment of \$10,000 in cash, and has agreed to make share payments in the aggregate value of \$200,000. Share payments of 200,000 common shares are to be made annually on a value date four months after the date of issue, until the related liability has been extinguished. (See Note 7 – Long-term debt).

(c) Mineral Property Interests Commitments

To maintain its mineral property interests, the Company is required to make no cash payments in fiscal 2008, but is scheduled to issue 200,000 common shares in fiscal 2009. This relates to the common shares to be issued on the mortgage payable relating to an acquisition of surface rights.

6. Investments:

Name of Company	Number of Shares	Cost	Accumulated Unrealized Holding Gains (Losses)	Carrying Value

(an exploration stage company)

Notes to Interim Financial Statements

Three and six months ended June 30, 2008 and 2007

(Unaudited – prepared by management)

7. Long-term debt:

The Company entered into a long-term agreement, secured by a mortgage payable, relating to the acquisition of surface rights on its Jersey property in British Columbia (See Note 5 (b)). Payment terms are as follows: upon receipt of regulatory approval which was June 1, 2006, \$10,000 paid in cash and 200,000 common shares issued. Thereafter, payments are to be made as follows: on June 1, 2007, up to 200,000 common shares; on June 1, 2008, up to 200,000 common shares and on June 1, 2009, up to 200,000 common shares.

The common shares referred to above are to be valued at the closing market price for the shares on the date that is four (4) months plus one (1) day after the date of issuance of the share payment (the "Valuation Date"), or October 2 of each year. The value of each share payment is to be calculated as of the Valuation Date and a credit given accordingly to the balance due on the purchase price. If the calculation and credit results in the mortgage on the property being paid in full, then the seller is not entitled to any further share payments. If, after the Valuation Date for the payments referred to above, the seller has still not received the full payment of the related liability and purchase price of the property, the Company will pay the remaining balance to the seller by way of a cash payment.

The Company has the right, at any time after completing the initial payment of cash and shares as set out above, to pay any remaining balance to fully satisfy the purchase price in the form of a cash payment. The current portion of the mortgage payable is estimated by the number of shares to be issued in June 2009 and valued using the closing market price for the common shares of the Company at June 30, 2008, of \$0.14 (December 31, 2007 - \$0.265). Any gain or loss resulting from the difference between the recorded prices of the common shares issued and the Valuation Date is recorded as an adjustment to the balance payable with a corresponding amount recorded in operations. The debt financing adjustment for the year ended December 31, 2007, was a gain of \$14,000, compared to an expense of \$6,000 in the year ended December 31, 2006.

	June 30, 2008	December 31, 2007
Long-term debt, beginning of period	\$ 97,000	\$ 158,000
Less cash payment	--	--
Less payments made in common shares on valuation date	(30,000)	(61,000)
Long-term debt, end of period	67,000	97,000
Current portion of long-term debt	\$ 28,000	\$ 53,000

8. Share capital:

(a) Authorized:

Unlimited number of common shares without par value and an unlimited number of preferred shares without par value.

(b) Issued and outstanding:

See Interim Statements of Shareholders' Equity.

The Company's independent auditor has not performed a review of these interim financial statements.

SULTAN MINERALS INC.

(an exploration stage company)

Notes to Interim Financial Statements

Three and six months ended June 30, 2008 and 2007

(Unaudited – prepared by management)

8. Share capital (continued):

(c) Flow-through shares

In 2007, the Company issued 3,803,000 flow-through shares ("FTS") for gross proceeds of \$1,331,050. Under the FTS agreements, the Company agreed to renounce \$1,331,050 of qualifying expenditures to the investors effective December 31, 2007, although under Canadian tax law the expenditures may actually be incurred up to December 31, 2008.

The Company has estimated that the future income taxes recorded at the time of renunciation will be approximately \$380,012. During the period, the Company recognized a reduction in share capital and a recovery of future income taxes of approximately \$380,012.

(d) Stock options

The Company has a stock option plan which allows for the grant of options to purchase up to 20,390,173 common shares. The following table summarizes information about the stock options outstanding at June 30, 2008:

Weighted Average Exercise Price	Number Outstanding at June 30, 2008	Weighted Average Remaining Contractual Life
\$0.10	1,500,000	1.9 years
\$0.15	2,379,000	1.0 years
\$0.17	2,500,000	3.0 years
\$0.25	250,000	3.8 years
\$0.40	250,000	3.8 years
\$0.60	250,000	3.8 years
\$0.45	2,334,000	4.3 years
\$0.29	2,835,000	4.3 years
\$0.29	200,000	4.7 years
\$0.25	12,498,000	3.1 years

A summary of the changes in stock options for the period ended June 30, 2008, is presented below:

	Shares	Weighted Average Exercise Price
Balance, December 31, 2007	12,534,500	\$0.25
Granted	200,000	\$0.29
Exercised	(168,750)	\$0.13
Cancelled	(67,750)	\$0.35
Balance, June 30, 2008	12,498,000	\$0.25
Balance vested, June 30, 2008	9,576,000	\$0.22

The Company's independent auditor has not performed a review of these interim financial statements.

SULTAN MINERALS INC.

(an exploration stage company)

Notes to Interim Financial Statements

Three and six months ended June 30, 2008 and 2007

(Unaudited – prepared by management)

8. Share capital (continued):

(d) Stock options (continued)

The Company granted 200,000 stock options to consultants at a price of \$0.29, with an expiry date of March 17, 2013. The fair value of the stock option granted was estimated on the date of grant using a Black-Scholes option-pricing model with weighted average assumptions as follows: risk-free interest rate – 3.86%; expected life of 5 years; expected volatility – 82%; and a weighted average fair value per option grant of \$0.21.

(e) Share purchase warrants

As at June 30, 2008, the following share purchase warrants issued in connection with financings made by private placements and short-form offerings were outstanding:

Number of Warrants	Exercise Price	Expiry Date
291,237	\$0.25	October 18, 2008
9,185,000	\$0.25	January 11, 2009
289,750*	\$0.16	January 11, 2009
289,750	\$0.25	January 11, 2009
5,738,750	\$0.30	November 10, 2008
918,200	\$0.30	November 10, 2008
2,523,182	\$0.30	November 10, 2008
316,800	\$0.30	November 10, 2008
3,803,000	\$0.50	December 12, 2009
319,300	\$0.50	December 12, 2009
23,674,969		

* Underlying agent's warrants, exercisable at \$0.16 to receive one share and one half-warrant. Each full warrant is then exercisable until January 11, 2009 at a price of \$0.25.

Notes to Interim Financial Statements

Three and six months ended June 30, 2008 and 2007

(Unaudited – prepared by management)

9. Related party transactions and balances (continued):

- (a) Management, administrative, geological and other services are provided by LMC Management Services Ltd. ("LMC"), a private company held jointly by the Company and other public companies, to provide services on a full cost recovery basis to the various public entities currently sharing office space with the Company. There is no difference between the cost of \$1 and equity value. The Company has a 25% interest in LMC. Three months of estimated working capital is required to be on deposit with LMC under the terms of the services agreement.
- (b) Lang Mining Corporation ("Lang Mining") is a private company controlled by the chairman of the Company. Lang Mining receives a management fee of \$2,500 per month for the services of Frank A. Lang, an officer and director of the Company.
- (c) Consulting fees were paid to Kent Avenue Consulting Ltd., a private company controlled by Sargent H. Berner, a director of the Company.
- (d) The Company's investments include shares in a listed company with a common director.
- (e) Balances payable to and receivable from related parties are included in due to and due from related parties, respectively, on the balance sheets. These amounts are non-interest bearing and are due on demand.

Sultan Minerals Inc.
Management Discussion and Analysis
for the Three and Six Months Ended
June 30, 2008

1.1 Date

The effective date of this interim report is August 28, 2008.

1.2 Overview

This Management's Discussion and Analysis ("MD&A") contains certain "Forward-Looking Statements." All statements, other than statements of historical fact included herein, including without limitation, statements regarding potential mineralization and resources, research and development activities, and future plans of the Company are forward looking statements that involve various risks and uncertainties including changes in future prices of gold and other metals; variations in ore reserves, grades or recovery rates, accidents, labour disputes and other risks associated with mining; delays in obtaining governmental approvals or financing or in the completion of development or construction activities, technological obsolescence, and other factors. The Company expressly disclaims any obligation to revise or update forward-looking statements and any liability in the event actual results differ from those currently anticipated.

This interim MD&A should be read in conjunction with the unaudited interim financial statements of Sultan Minerals Inc. for the three and six months ended June 30, 2008. All dollar figures stated herein are expressed in Canadian dollars, unless otherwise specified.

Sultan Minerals Inc. ("Sultan" or the "Company") is a mineral exploration company. The Company has a portfolio of mineral exploration projects and the following is a brief summary of its current activities.

- Sultan's loss for the six months ended June 30, 2008 ("fiscal 2008") was \$328,358 or \$0.00 per common share, after income tax recovery of \$380,012, due to flow-through renunciations and income taxes on capitalized stock-based compensation, compared to a loss of \$414,723 or \$0.00 per common share in the six months ended June 30, 2007 ("fiscal 2007"), also after income tax recovery due to flow-through renunciations of \$68,172.
- During fiscal 2008, operations utilized cash of \$413,391 compared to \$449,604 in fiscal 2007.
- Cash expenditures on mineral property interests totalled \$1,016,523 in fiscal 2008 compared to \$1,057,141 in fiscal 2007. Total expenditures were incurred on the following mineral properties in fiscal 2008, with the fiscal 2007 numbers in brackets: Kena - \$31,633 (\$1,850); the Stephens Lake Property - \$Nil (\$14,670) and the Jersey and Emerald properties - \$1,053,396 (\$1,110,541).
- The Company received total cash of \$251,921 by the issuance of 1,524,350 common shares in fiscal 2008 through the exercise of stock options, warrants and agent's warrants.

1.2.1 Jersey and Emerald Properties, British Columbia

The 9,500-hectare Jersey-Emerald Property is located in south-eastern British Columbia, 10 kilometres southeast of the mining community of Salmo. The Jersey-Emerald Property is host to the former Emerald Tungsten Mine, which was Canada's second largest tungsten producer and the historic Jersey Lead-Zinc Mine, British Columbia's second largest lead-zinc producer. Sultan optioned the initial claims in 1993 and has since expanded its holdings through staking and additional option agreements. In 2005 molybdenum mineralization was discovered beneath the tungsten workings. In the mine area there is an existing network of underground tunnels and workings over a two-square kilometre area that provides excellent access to the margins of the recently identified molybdenum deposit. Sultan presently holds

Sultan Minerals Inc.
Management Discussion and Analysis
for the Three and Six Months Ended
June 30, 2008

100% interest in the original claims subject to an advance annual royalty payment of \$50,000 scheduled to commence October 20, 2009, and an aggregate 3.0% Net Smelter Return ("NSR") royalty due to the property optionors. Sultan can reduce the NSR royalty to 1.5% by making a payment of \$500,000 and issuing 50,000 common shares.

The Company is taking the necessary steps to advance the known molybdenum and tungsten deposits at our Jersey-Emerald mine as is evident by our land acquisitions and our current drilling program, which is well underway. Sultan now owns 1,100 acres of surface rights over the proposed mine site.

EXPLORATION

All detailed assay results can be viewed in news releases on the Company's website www.sultanminerals.com or on www.sedar.com.

In 2008, diamond drilling has been underway on the East Dodger Molybdenum Zone where underground drill hole JM07-04 intersected 0.10% MoS₂ over a core length of 548.0 feet. The intersection included several higher-grade sections that included 0.28% MoS₂ over 79.9 feet, 0.23% MoS₂ over 43.0 feet and 1.81% MoS₂ over 9.9 feet.

The Dodger Molybdenum Zone has now been intersected in 36 drill holes and favourable results from drill-holes JM08-08 and JM08-09 expand the zone to the south. Hole JM08-08 assayed 0.16% molybdenum (MoS₂) over a core length of 85.0 feet within a 288.0 foot section that averaged 0.07% MoS₂. The hole contained several very high-grade molybdenum bearing zones including 1.74% MoS₂ over 3.0 feet, 0.44% MoS₂ over 5.0 feet and 0.81% MoS₂ over 4.3 feet. Hole JM08-09, located 100 feet south of hole JM08-08, assayed 0.08% MoS₂ over a core length of 105.0 feet including 1.04% MoS₂ over 5.0 feet. This hole also intersected a 10.0-foot wide quartz vein that assayed 0.5% MoS₂ and 0.40 g/t gold.

Tungsten mineralization was also intersected in many of the holes and is believed to represent the western extension of the East Dodger Tungsten Zone. The most notable intercept was in hole JM08-09 that assayed 0.73% tungsten (WO₃) over a core length of 9.10 feet within a 23.6 foot section that averaged 0.35% WO₃.

Diamond drilling is presently underway on the recently discovered East Emerald Tungsten Zone where assays are pending for eight surface drill holes. This bulk tonnage deposit has been successfully traced by drilling over a length of 2,700 feet (800 metres), and a width of 700 feet (200 metres). The zone remains open to the north, south and west.

Exploration expenditures on the Jersey-Emerald property in fiscal 2008 with the fiscal 2007 comparative figures shown in brackets include the following: assays and analysis - \$148,765 (\$56,553); drilling - \$409,228 (\$443,332); engineering - \$15,000 (\$131,936); environmental - \$56,273 (\$Nil); geological and geophysical - \$192,564 (\$170,029); travel and accommodation - \$47,769 (\$38,876); stock-based compensation - \$76,405 (\$5,803) and site activities - \$97,730 (\$145,775). Acquisition costs of \$9,662 (\$118,237) were incurred.

In July 2007 Sultan engaged Wardrop Engineering to undertake an environmental baseline study on the Jersey-Emerald Property. Sultan is aggressively advancing the development of the Jersey-Emerald project with the objective of re-opening this historic tungsten and lead-zinc producer which was formerly owned and operated by Placer Dome.

The environmental assessment will take approximately 14 months to complete and will primarily cover water quality data and biological sampling including fish, invertebrates and habitat description. In

Sultan Minerals Inc.
Management Discussion and Analysis
for the Three and Six Months Ended
June 30, 2008

conjunction with this environmental baseline study, Wardrop is supervising metallurgical studies that are currently underway on the tungsten and molybdenum mineralization.

Mr. Ed Lawrence, P.Eng., former Manager of the Jersey and Emerald Mines, is managing the ongoing diamond drilling programs. Mr. Perry Grunenberg, P.Geo., of PBG Geoscience in Kamloops, BC, is Sultan's project supervisor and "Qualified Person" for the purpose of NI 43-101, "Standards of Disclosure for Mineral Projects." Standard sampling procedures are used whereby the core is split with a core splitter and half of the core sent by trucking company directly to either Acme Labs Ltd. in Vancouver or Assayers Canada in Vancouver for assay by standard analytical procedures. The remaining half of the core is stored in the Company's core storage facility in Salmo, BC. All sample preparation is done at the laboratory by Acme or Assayers Canada staff. Checks are being run on 5% of the samples at Becqueral Laboratories in Mississauga, Ontario for tungsten and Assayers Canada in Vancouver, BC for other elements.

1.2.2 Kena Gold Property, British Columbia

The Company holds 100% interest in the original Kena Gold Property located near the community of Ymir in southeastern British Columbia. Of particular interest to Sultan is a 7.0-kilometre long gold soil anomaly located near the north end of the property. The soil anomaly encompasses the Gold Mountain and Kena Gold Zones, both of which host porphyry gold deposits (refer to Sultan's website maps at www.sultanminerals.com/s/KenaMaps.asp). From 2000 to 2004, Sultan tested the two zones with 12,000 metres of diamond drilling in 80 drill holes. Preliminary resource calculations were prepared by Giroux Consultants Ltd. in June 2004 and the resulting NI 43-101 Technical Report was co-authored by independent geological consultants, Gary Giroux, P.Eng., of Giroux Consultants Ltd. and Linda Dandy, P.Geo of P & L Geological Consultants Ltd.

Exploration expenditures on the Kena property in fiscal 2008, with the fiscal 2007 comparative figures shown in brackets, include the following: assays and analysis – \$9,750 (\$Nil); geological and geophysical – \$9,746 (\$987); travel and accommodation - \$1,157 (\$Nil); and site activities – \$2,398 (\$741). Acquisition costs of \$8,582 (\$122) were incurred.

Recommendations

The June 2004 Technical Report shows that the Gold Mountain and Kena Gold Zones had a measured and indicated resource of 24,860,000 tonnes containing 541,000 ounces of gold at an average grade of 0.66 g/T using a 0.3 g/T cut-off grade for gold. There is an additional inferred resource of 25,800,000 tonnes containing 557,000 ounces of gold at the same grade (June 7, 2004, News Release). The report stated that the resource has potential for expansion with additional diamond drilling.

A computer modeling of the property was completed as part of the 2004 resource study. The model indicated numerous untested areas adjacent to mineralized blocks. The report recommended that a \$1.2 million diamond drill program be conducted in order to significantly expand resources in the Gold Mountain and Kena Gold Zones.

Gold Zone

In February Sultan received final gold assays for a deep drill hole completed in December 2007. This drill hole, located centrally in the Gold Mountain Zone of the Kena Property, confirms that gold mineralization extends from surface to a hole depth of 435.33 metres (1,428 feet), well below any previous drill intersections.

From bedrock surface to a depth of 435.33 metres, diamond drill hole GM07-01 assays 0.50 g/t gold over a core length of 430.0 metres (1,428 feet). Of particular interest is a 101.27-metre section that averages 0.84 g/t gold from 230.73 to 332.00 metres. This intersection occurs below the level of previous drilling

Sultan Minerals Inc.
Management Discussion and Analysis
for the Three and Six Months Ended
June 30, 2008

on this target. The hole also contained several higher grade sections including 10.99 g/t gold over 4.0 metres, 9.10 g/t gold over 1.27 metres and 11.26 g/t gold over 2.0 metres.

Results from this recent drilling program are consistent with previous results which demonstrate that the Gold Mountain Zone is host to bulk tonnage, porphyry style, gold mineralization containing narrower, very high-grade gold shoots. The hole cut classic, gold bearing, porphyry style mineralization to a hole depth of 457 metres (1,500 feet) where the hole intersected the unmineralized volcanics that form the east wall of the Gold Mountain Zone. The results suggest that the Gold Mountain Zone which was previously drilled to less than 240 metres depth may extend to much greater depths and be much larger than previously believed.

The focus of the recent drill program was to expand the preliminary gold resource announced in the NI 43-101 report of June 2004. In 2008 Sultan plans a trenching and drilling program to trace the mineralization to the south where the soil anomaly overlaps the Kena Porphyry Copper Zone. (See News Release of January 29, 2008).

Ms Linda Dandy, P.Geo of P&L Geological Services of Lac Le Jeune, BC, is the Company's project supervisor and "Qualified Person" for the purpose of National Instrument 43-101, "Standards of Disclosure for Mineral Projects".

1.2.3 Stephens Lake Property, Manitoba

The Stephens Lake - Trout Claim Group is situated 100 kilometres east of Gillam, Manitoba. The Company is in a joint venture with ValGold Resources Ltd. and Cream Minerals Ltd. (the "Companies"). The Companies now hold only 75% of the Trout Claim Group, which are internal to the claims initially forming the Stephens Lake Property.

1.2.4 Mineral Property Option Payments Due In Fiscal 2008

To maintain its mineral property interests the Company is required to make no cash payments in fiscal 2008, but is scheduled to issue 200,000 common shares in fiscal 2008, related to the mortgage payable on the acquisition of surface rights, which were issued.

1.2.5 Market Trends

The price of gold has increased, continuing an overall uptrend, which began in 2004. The average gold price in 2006 averaged US\$603.46 per ounce. In 2007 gold averaged US\$693.39 per ounce, and in 2008, the average price has increased to US\$906.87 at August 28, 2008. The average price for molybdenum (roasted) in 2006 was US\$25.56 per pound, and in 2007 averaged US\$29.72 per pound.

Revenue

Sultan has no source of revenue. Interest earned on excess cash is incidental income. Interest revenue increased from \$37,432 in fiscal 2007 to \$63,528 in fiscal 2008 due to higher cash balances and higher interest rates throughout the fiscal 2008 period. The Company earned \$21,982 from sales of logs in fiscal 2007, compared to \$Nil in fiscal 2008.

Expenses

Legal, accounting and audit decreased from \$42,526 in fiscal 2007 to \$17,485 in fiscal 2008. Audit fees are accrued throughout the fiscal year. Overall, audit time is increasing on an annual basis, and will continue to do so, as public company auditors and public companies continue to comply with the extensive detail in the working papers which are required by the Canadian Public Accountability Board, as they review the audit firms that audit public companies. Either external consultants must be hired to

Sultan Minerals Inc.
Management Discussion and Analysis
for the Three and Six Months Ended
June 30, 2008

comply, or in the case of companies who have administrative and accounting services provided as in the case of Sultan, the time, and therefore the cost, required to complete the extra detail, must be passed onto the Company. Legal fees are ongoing and will vary depending on the activity during the period.

Management fees of \$2,500 per month are paid to Lang Mining Corporation, a private company, for the services of Frank Lang as Chairman of the Company, for a total of \$7,500 in each fiscal period. In fiscal 2008, consulting fees of \$12,750 (2007 - \$9,000) were paid through LMC Management Services Ltd. to Kent Avenue Consulting Ltd., a private company controlled by Sargent H. Berner, a director of the Company.

Office and administration costs increased from \$40,182 in fiscal 2007 to \$63,960 in fiscal 2008. The office and administration costs include rent, shared office services and other costs related to administration of a public company. An additional company shared office premises in the first five months of fiscal 2007, reducing costs in that period.

Salaries and benefits increased from \$131,060 in fiscal 2007 to \$141,559 in fiscal 2008, due to timing of work related to the Company's fiscal 2007 annual audit. Salaries will likely increase overall in 2008 as the shortage of qualified professionals in the mining industry is contributing to increased salary and benefits costs.

In fiscal 2007, there was \$71,122 in stock-based compensation expense, compared with \$317,719 in fiscal 2008. In addition, stock-based compensation costs of \$5,776 were capitalized to the Jersey-Emerald Property in fiscal 2008, plus related future income tax liability of \$20,629, compared to \$5,803 capitalized in fiscal 2007. Options granted in July and October of 2007 are being amortized over the vesting period of eighteen months from the date of grant. The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options that are fully transferable and have no vesting restrictions. The Company's stock options are not transferable and cannot be traded. The B-S model also requires an estimate of expected volatility. The Company uses historical volatility rates to arrive at an estimate of expected volatility.

Shareholder communications costs have increased from \$133,190 in fiscal 2007 to \$167,369 in fiscal 2008. The Company utilized the services of Arbutus Enterprises Ltd. \$12,000 (2007 - \$12,000) and Horng Kher (Marc) Lee \$34,000 (2007 - \$18,000), and CHF Investor Relations ("CHF") \$45,000 (2007 - \$20,000). Other shareholder activities consist of web site maintenance, transfer agent fees, regulatory and filing fees and all costs associated with timely disclosure of information. CHF were granted stock options on March 29, 2007. These stock options will expire on August 30, 2008, as the contract with them has been cancelled.

In June 2008, the Company retained Renmark Financial Communications Inc. ("Renmark") to assist with its investor relations activities. Renmark will provide its services to Sultan on a month-to-month basis and will be paid a monthly retainer of \$7,000 plus allowable disbursements. Cancellation of contract for services by either party requires one month's written notice.

Travel and conference expenses increased from \$24,386 in fiscal 2007 to \$35,046 in fiscal 2008 due to a general increase in travel costs, primarily related to costs incurred attending the Prospectors and Developers Conference.

Property investigation costs decreased from \$1,903 in fiscal 2007 to \$Nil in fiscal 2008. Sultan is presented with property submittals continually, and certain submissions are reviewed for possible acquisition. The costs related to submittals are capitalized if the property is acquired, or expensed if the

Sultan Minerals Inc.
Management Discussion and Analysis
for the Three and Six Months Ended
June 30, 2008

property is not acquired.

In fiscal 2008, the Company had no write-downs in mineral property interests, but in fiscal 2007, \$72,930 incurred in costs related to the Silver King claims at the Kena property was written off.

In accordance with CICA Handbook Section 3465 – Income Taxes, the Company has recorded a provision at the time of the actual renunciation, by a reduction in the amount included in share capital relating to the FTS, for the future income taxes related to the deductions foregone by the Company. The Company renounced flow through expenditures in the year ended December 31, 2007, and as a consequence, recognized a reduction in share capital and a recovery of future income taxes of \$359,383 in fiscal 2008. Additional income tax recovery relates to capitalized stock-based compensation.

In accordance with CICA Handbook Section 3465 – Income Taxes, the Company has recorded a provision at the time of the actual renunciation, by a reduction in the amount included in share capital relating to the FTS, for the future income taxes related to the deductions foregone by the Company. The Company renounced flow through expenditures in the year ended December 31, 2006, and as a consequence, recognized a reduction in share capital and a recovery of future income taxes of \$68,172 in fiscal 2007.

1.5 Summary of Quarterly Results

The table below provides, for each of the most recent eight quarters, a summary of exploration costs on a project-by-project basis and of corporate expenses, net of interest income, mineral property write-downs and property investigations.

	Kena property. British Columbia	Jersey Emerald and other properties	Stephens Lake property, Manitoba	General and adminis- trative expenses (recovery) (Note 1)	Loss per quarter	Loss per share
2006						
Third Quarter	350	192,410	35,758	177,069	176,267	\$0.00
Fourth Quarter	92,223	272,419	21	166,162	272,651	\$0.01
2007						
First Quarter	1,179	395,279	--	217,812	139,458	\$0.00
Second Quarter	671	715,262	14,670	249,664	275,265	\$0.00
Third Quarter	7,888	688,297	20,416	369,930	355,251	\$0.00
Fourth Quarter	161,976	843,265	--	543,111	498,286	\$0.01
2008						
First Quarter	25,277	611,894	--	414,400	4,919	\$0.00
Second Quarter	6,356	441,502	--	357,497	323,439	\$0.00

Note 1: General and administrative expenses do not include the write-down of mineral property interests, investments, property investigations, interest and other miscellaneous income or income tax recovery, but includes stock-based compensation.

Note 2: Property acquisition and exploration costs exclude the write-down of mineral property interests.

Sultan Minerals Inc.
Management Discussion and Analysis
for the Three and Six Months Ended
June 30, 2008

Three months ended June 30, 2008 ("Q2 2008") compared to three months ended June 30, 2007 ("Q2 2007")

Revenue

Sultan has no source of revenue. Interest earned on excess cash is incidental income. Interest and other income decreased from \$48,322 in Q2 2007 to \$25,934 in Q2 2008 due to significantly higher cash balances and higher interest rates in fiscal 2007 as compared to fiscal 2008.

Expenses

Legal, accounting and audit decreased from \$19,000 in Q2 2007 to \$11,090 in Q2 2008. Audit fees are accrued throughout the fiscal year, and are anticipated to increase in fiscal 2008. The Q2 2007 expense included higher than anticipated audit costs for the fiscal 2006 audit, which were invoiced in Q2 2007.

Management fees of \$2,500 per month are paid to Lang Mining Corporation, a private company, for the services of Frank Lang as Chairman of the Company, for a total of \$7,500 in each fiscal quarter. In Q2 2008, management fees of \$8,250 (Q2 2007 - \$4,500) were paid through LMC Management Services Ltd. to Kent Avenue Consulting Ltd., a private company controlled by Sargent H. Berner, a director of the Company.

Office and administration costs increased from \$19,224 in Q2 2007 to \$34,049 in Q2 2008. The office and administration costs include rent, shared office services and other costs related to administration of a public company.

Salaries and benefits have increased from \$60,274 in Q2 2007 to \$78,972 in Q2 2008. Salaries are likely to remain at high levels as the shortage of qualified professionals in the mining industry continues to contribute to increased salary and benefits costs.

In Q2 2007, there was \$42,239 in stock-based compensation expense, compared with \$125,721 in Q2 2008. In addition, stock-based compensation costs of \$2,903 were capitalized to the Jersey-Emerald Property in Q2 2007 and \$21,966 including related future income tax liability of \$8,124 was capitalized in Q2 2008.

Shareholder communications increased from \$78,858 in Q2 2007 to \$79,088 in Q2 2008. The Company utilized the services of Arbutus Enterprises Ltd. \$6,000 (Q2 2007 - \$6,000) and Horng Kher (Marc) Lee \$18,000 (Q2 2007 - \$11,000). In addition, CHF Investor Communications were paid \$22,500 in Q2 2007 and \$22,500 in Q2 2008.

Travel and conference expenses decreased from \$17,564 in Q2 2007 to \$12,322 in Q2 2008.

In Q2 2007, \$72,930 incurred in costs related to the Silver King claims at the Kena Property was written off with no write-downs in Q2 2008.

1.6 Liquidity

Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements to sophisticated investors and institutions. The Company has issued common shares in each of the past few years, pursuant to private placement financings and the exercise of

Sultan Minerals Inc.
Management Discussion and Analysis
for the Three and Six Months Ended
June 30, 2008

warrants and options.

At June 30, 2008, Sultan's working capital, defined as current assets less current liabilities, was \$3,006,232, compared with working capital of \$4,124,973 at December 31, 2007. The Company's cash in excess of current expenditures is held in Guaranteed Investment Certificates.

Investing Activities

Acquisitions and Exploration Programs

The following provides the details of the property agreements and the exploration expenditures related to its mineral property interests during the period.

At June 30, 2008, Sultan had capitalized \$8,205,133, representing costs associated with the acquisition and exploration of its mineral property interests in British Columbia and Manitoba. During the six months ended June 30, 2008, Sultan's expenditures included \$1,085,029 on the acquisition and exploration of its mineral property interests compared to \$1,127,061 in the six months ended June 30, 2007.

The Company entered into a long-term agreement, secured by a mortgage payable, relating to the acquisition of surface rights on its Jersey property in British Columbia. Payment terms are as follows: upon receipt of regulatory approval which was June 1, 2006, \$10,000 was paid in cash and 200,000 common shares were issued. Thereafter, payments are to be made as follows: on June 1, 2007, up to 200,000 common shares (200,000 issued); on June 1, 2008, up to 200,000 common shares (200,000 issued) and June 1, 2009, up to 200,000 common shares.

The common shares referred to above are to be valued at the closing market price for the shares on the date that is four (4) months plus one (1) day after the date of issuance of the share payment (the "Valuation Date"), or October 2 of each year. The value of each share payment is to be calculated as of the Valuation Date and a credit given accordingly to the balance due on the purchase price. If the calculation and credit results in the mortgage on the property being paid in full, then the seller is not entitled to any further share payments. If, after the Valuation Date for the payments referred to above, the seller has still not received the full payment of the related liability and purchase price of the property, the Company will pay the remaining balance to the seller by way of a cash payment.

The Company has the right, at any time after completing the initial payment of cash and shares as set out above, to pay any remaining balance to fully satisfy the purchase price in the form of a cash payment. The current portion of the mortgage payable is estimated by the number of shares to be issued in June 2008 and valued using the closing market price for the common shares of the Company at October 2, 2007, of \$0.305 (June 30, 2008 - \$0.14). Any gain or loss resulting from the difference between the recorded market value of the common shares issued on June 2, 2008 of \$0.15, and the Valuation Date is recorded as an adjustment to the balance payable with a corresponding amount recorded in operations.

1.7 Capital Resources

During the six months ended June 30, 2008, the Company issued 1,341,500 common shares on the exercise of 1,341,500 share purchase warrants at a price of \$0.17; 4,700 common shares on the exercise of 4,700 agent's warrants at a price of \$0.17, 9,400 common shares on the exercise of 9,400 agent's warrants at a price of \$0.12, and 168,750 common shares on the exercise of stock options at prices ranging from \$0.10 to \$0.17, for total proceeds of \$231,292. The Company granted 200,000 stock

options to consultants at an exercise price of \$0.29, with an expiry date of March 17, 2013. The fair value of the stock options granted was estimated on the date of grant using a Black-Scholes option-pricing model with weighted average assumptions as follows: risk-free interest rate – 3.86%; expected life of 5 years; expected volatility – 82%; and a weighted average fair value per option grant of \$0.21.

The Company will require continued external funding to meet future obligations and to finance further exploration and development work on its mineral properties. The Company currently has funds available to complete all of its currently planned exploration programs, but as the Company does not have a source of revenue, there is doubt as to the Company's ability to continue as a going concern. Although the Company has been successful in raising funds to date, there can be no assurance that additional funding will be available in the future. The balance sheets of the Company at June 30 31, 2008, and December 31, 2007, do not reflect the adjustments to the carrying values of assets and liabilities that would be necessary if the Company were unable to obtain adequate financing.

1.8 Off-Balance Sheet Arrangements

None.

1.9 Transactions with Related Parties

	Six months ended June 30,	
	2008	2007

Kent Avenue Consulting Ltd. (c)	12,750	9,000
	June 30,	December 31,
	2008	2007
Balances receivable from (e):		
LMC Management Services Ltd.	\$ 111,002	\$ 74,208
Directors and officers	--	828
	111,002	75,036
Balances payable to (e):		
Directors and officers	\$ --	\$ 420

(a) Management, administrative, geological and other services are provided by LMC Management Services Ltd. ("LMC"), a private company held jointly by the Company and other public companies, to provide services on a full cost recovery basis to the various public entities currently sharing office space with the Company. There is no difference between the cost of \$1 and equity value. The Company has a 25% interest in LMC. Three months of estimated working capital is required to be on deposit with LMC under the terms of the services agreement.

(b) Lang Mining Corporation ("Lang Mining") is a private company controlled by the chairman of the Company. Lang Mining receives a management fee of \$2,500 per month for the services of Frank A. Lang, an officer and director of the Company.

(c) Consulting fees were paid to Kent Avenue Consulting Ltd., a private company controlled by Sargent H. Berner, a director of the Company.

(d) The Company's investments include shares in a listed company with a common director.

- (e) Balances payable to and receivable from related parties are included in due to and due from related parties, respectively, on the balance sheets. These amounts are non-interest bearing and are due on demand.

1.10 Fourth Quarter

Not applicable.

1.11 Proposed Transactions

There is no proposed asset or business acquisition or disposition before the board of directors for consideration, other than those in the ordinary course of business or as described in items 1.6 or 1.7 above.

1.12 Critical Accounting Estimates

As at June 30, 2008, the Company was a venture issuer.

1.13 Critical accounting policies and changes in accounting policies

Financial Instruments – Recognition and Measurement.

Section 3855 requires that all financial assets, except those classified as held to maturity, and derivative financial instruments, must be measured at fair value. All financial liabilities must be measured at fair value when they are classified as held for trading; otherwise, they are measured at amortized cost. Investments and comprehensive income Investments and comprehensive income

Financial instruments – recognition and measurement.

The Company accounts for its portfolio investments as long-term investments. Section 1530 – “Comprehensive Income” of the Canadian Institute of Chartered Accountants Handbook (“CICA”) is the change in the Company’s net assets that results from transactions, events and circumstances from sources other than the Company’s shareholders and includes items that would not normally be included in net earnings such as unrealized gains or losses on available-for-sale investments. Other comprehensive income includes the holding gains and losses from available-for-sale securities, which are not included in income (loss) and realized.

Investments classified as available-for-sale are reported at fair market value (or mark to market) based on quoted market prices with unrealized gains or losses excluded from the earnings or loss and reported as other comprehensive income or loss.

Comprehensive income and transition adjustment to opening balance

The adoption of Sections 1530 and 3855 impacts the opening equity and losses of the Company. The unrealized gain on the available for sale securities from purchase to December 31, 2007, was \$1,018, which is reported as an adjustment to the opening balance of accumulated other comprehensive income. The unrealized loss on the available-for-sale securities for the six months ended June 30, 2008, was \$391, which is reported in the current period. There would be no tax impact resulting from adjustments arising from comprehensive income as there are unrecorded income tax assets that would result in no income tax being payable.

Sultan Minerals Inc.
Management Discussion and Analysis
for the Three and Six Months Ended
June 30, 2008

Investments available for sale are reported at fair market value (or mark to market) based on quoted market prices with unrealized gains or losses excluded from earnings and reported as other comprehensive income or loss. Investments subject to significant influence are reported at cost and not adjusted to fair market value. All of the Company's investments have been designated as available for sale.

Accounting policy choice for transaction costs

On June 1, 2007, the Emerging Issues Committee of the CICA issued Abstract No. 166, "Accounting Policy Choice for Transactions Costs" (EIC 166). This EIC addresses the accounting policy choice of expensing or adding transaction costs related to the acquisition of financial assets and financial liabilities that are classified as other than held for trading. Specifically, it requires that the same accounting policy choice be applied to all similar financial instruments classified as other than held for trading, but permits a different policy choice for financial instruments that are not similar. The Company has adopted EIC 166 effective December 31, 2007, which requires retroactive application to all transaction costs accounted for in accordance with CICA Handbook Section 3855, Financial Instruments – Recognition and Measurement. The Company has evaluated the impact of EIC 166 and determined that no adjustments are currently required.

1.14 Financial Instruments and Other Instruments

Section 3855 requires that all financial assets, except those classified as held to maturity, and derivative financial instruments, must be measured at fair value. All financial liabilities must be measured at fair value when they are classified as held for trading; otherwise, they are measured at cost. Investments available for sale are reported at fair market value (or mark to market) based on quoted market prices with unrealized gains or losses excluded from earnings and reported as other comprehensive income or loss. Investments subject to significant influence are reported at cost and not adjusted to fair market value. All of the Company's investments have been designated as available-for-sale.

1.15.1 Other MD&A Requirements

See the audited annual financial statements for the year ended December 31, 2007 and the unaudited interim financial statements for the three and six months ended June 30, 2008.

1.15.2 Additional Disclosure for Venture Issuers without Significant Revenue

(a) capitalized or expensed exploration and development costs

The required disclosure is presented in the schedule of mineral property interests attached to the audited financial statements.

(b) expensed research and development costs

Not applicable.

(c) deferred development costs

Not applicable.

June 30, 2008

Shareholder Rights Plan

The Company's board of directors and its shareholders have approved the adoption of a Shareholder Rights Plan (the "Rights Plan"), which has been implemented by way of a rights plan agreement (the "Rights Plan Agreement") designed to protect shareholders from unfair, abusive or coercive takeover strategies including the acquisition of control of the Company by a bidder in a transaction or series of transactions that may not treat all shareholders fairly nor afford all shareholders an equal opportunity to share in the premium paid upon an acquisition of control. The board of directors of the Company (the "Board") considered that the adoption of the Rights Plan was desirable and in the interests of all of the Company's shareholders. The Rights Plan Agreement was adopted to provide the Board with sufficient time, in the event of a public takeover bid or tender offer for the common shares of the Company, to pursue alternatives which could enhance shareholder value. These alternatives could involve the solicitation of other takeover bids or offers from other interested parties to provide shareholders desiring to sell the Company's common shares with the best opportunity to realize the maximum sale price for their common shares. In addition, with sufficient time, the Board would be able to explore and, if feasible, advance alternatives to maximize share value through possible corporate reorganizations or restructuring. The directors considered that they would need more time than is allowed for under existing securities legislation in order to have any real ability to consider such alternatives.

As at October 31, 2006, the rights (the "Rights") were issued and attached to all of Sultan's outstanding common shares. A separate rights certificate will not be issued until such time as the Rights become exercisable (which is referred to as the "separation time"). The Rights will become exercisable only if a person, together with his or its affiliates, associates and others acting jointly, acquires or announces its intention to acquire beneficial ownership of Sultan common shares which when aggregated with his or its current holdings total 20% or more of the outstanding Sultan common shares (determined in the manner set out in the Rights Plan). The Rights will permit shareholders other than the acquiring person to purchase common shares of the Company at a 50% discount to their market price (as defined in the Rights Plan Agreement).

The Rights will not, however, be triggered by a "Permitted Bid", which is defined as a bid which is outstanding for a minimum of 60 days made to all of the shareholders of the Company for all of their common shares and, subject to other specified conditions, is accepted by a majority of independent shareholders (as detailed in the Rights Plan).

The Company has no knowledge of any pending or threatened takeover bids for the Company, and has no reason to believe that any takeover offer for the Company's shares is imminent.

Other Information

Controls and Procedures

In contrast to the certificate required under Multilateral Instrument 52-109 Certificate of Disclosure in Issuers' Annual and Interim Filings (MI 52-109), this Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures (DC&P) and internal control over financial reporting (ICFR), as defined in MI 52-109, in particular, the certifying officers filing this certificate are not making any representations relating to the establishment and maintenance of:

- i) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted

Sultan Minerals Inc.
Management Discussion and Analysis
for the Three and Six Months Ended

under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and

ii) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's GAAP.

The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in this certificate.

Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICRF as defined in MI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

Approval

The Board of Directors of Sultan Minerals Inc. has approved the disclosure contained in the Interim MD&A. A copy of this Interim MD&A will be provided to anyone who requests it and can be located, along with additional information, on the SEDAR website at www.sedar.com.

Caution on Forward-Looking Information

This Interim MD&A contains "forward-looking statements". These forward-looking statements are made as of the date of this MD&A and the Company does not intend, and does not assume any obligation, to update these forward-looking statements.

Forward-looking statements may include, but are not limited to, statements with respect to future remediation and reclamation activities, future mineral exploration, the estimation of mineral reserves and mineral resources, the realization of mineral reserve and mineral resource estimates, the timing of activities and the amount of estimated revenues and expenses, the success of exploration activities, permitting time lines, requirements for additional capital and sources and uses of funds.

Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, risks related to actual results of exploration activities; actual results of remediation and reclamation activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of gold and other commodities; possible variations in ore reserves, grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of exploration and development activities.

Certification of Interim Filings

I, Arthur G. Troup, President and Chief Executive Officer of Sultan Minerals Inc., certify the following:

1. **Review:** I have reviewed the interim financial statements and interim MD&A, (together the interim filings) of Sultan Minerals Inc. (the "issuer") for the interim period ending June 30, 2008.

1. **No misrepresentations:** Based on my knowledge, having exercised reasonable diligence, the interim filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, for the period covered by the interim filings.

3. **Fair presentation:** Based on my knowledge, having exercised reasonable diligence, the interim financial statements together with the other financial information included in the interim filings fairly present in all material respects the financial condition, results of operations and cash flows of the issuer, as of the date of and for the periods presented in the interim filings.

Date: August 28, 2008

VALGOLD COMPLETES ACQUISITION OF TOWER MOUNTAIN PROPERTY

Vancouver, August 25, 2008, ValGold Resources Ltd. ("ValGold") reports that, pursuant to an agreement (the "Agreement") dated June 25, 2002, it has commenced paying an annual pre-production royalty on its 100% interest in the Tower Mountain Gold Property (the "Property"). The Property comprises 49 mineral and 3 patent claims located in the Matawin Gold Belt approximately 40 kilometres west-northwest of Thunder Bay, Ontario.

Under the terms the Agreement, ValGold acquired a 100% interest in the Property by making total cash payments of \$220,000 and by completing \$1,000,000 in work on the Property over a four year period.

ValGold's interest is subject a 2.5% net smelter return royalty ("NSR"), which ValGold has the right to reduce to a 1.5% NSR by making a \$1,000,000 payment at any time up to commencement of production. Until the commencement of production, ValGold must pay an annual pre-production royalty of \$25,000 or, subject to regulatory approval, \$25,000 worth of ValGold common shares to be valued by averaging ValGold's common share closing price on the TSX Venture Exchange over the 20-day trading period immediately preceding the applicable payment date. The form of compensation payment to be made is at ValGold's sole discretion.

Numerous gold occurrences are found on the Property hosted by Timiskaming volcanics and sedimentary and intrusive rocks proximal to and associated with the Tower Mountain syenite complex. Both high-grade mineralization, associated by quartz-carbonate veins, and bulk tonnage/stockwork-style mineralization are found on the Property. Exploration work by ValGold on the Property began in November 2002 and has focused on diamond drilling. A total of eight drill programs comprising 75 drill holes, totaling 18,708 m, have been completed to date.

The table below summarizes the drill program and present highlights of each of the seven drill programs conducted by ValGold. Furthermore, details of the Property including a resource estimate for the U/V zone are provided in a NI 43-101 compliant report dated February 9, 2006, which can be found at www.SEDAR.com.

Highlights of Tower Mountain Gold Zones Drill Intersections
